**Re: Notice to Provide Communications Service**

Dear Sir or Madam:

Pursuant to Idaho Administrative Procedure Act 31.42.01, Rule 202, NextG Networks of California, Inc. d/b/a NextG Networks West ("NextG"), by its attorneys, provides this original plus seven copies of the following notice of its intent to provide service in Idaho. This rule requires communications service providers, other than basic local exchange service and interexchange MTS/WATS long distance service, to file such a notice with the Idaho Public Utilities Commission.

As indicated in Rule 202.02, NextG provides the following information:

- (1) The name of the telephone corporation and the business name of the telephone corporation if it does business under an assumed business name**

The name of the telephone corporation is NextG Networks of California, Inc. d/b/a NextG Networks West.

Idaho Public Utilities Commission

November 12, 2004

Page 2

- (2) The United States and electronic (if available) mailing addresses of the principal place of business of the telephone corporation, and, if there is a principal place of business in Idaho, the addresses of the principal place of business in Idaho**

NextG's principal place of business is located at the following address:

1759 South Main Street

Suite 128

Milpitas, CA 95035

Email address for regulatory affairs contact: arodriguez@nextgnetworks.net

NextG does not intend to have a principal place of business in Idaho.

- (3) An agent in Idaho for service of process by the Commission in the state of Idaho including the agent's United States and electronic (if available) mailing addresses**

CT Corporation System

300 North 6<sup>th</sup> Street

Boise, Idaho 83702

- (4) A description of the telecommunication services offered by the telephone corporation and a map of the area(s) served by the telephone corporation or in which the telephone corporation offers or intends to offer service**

NextG currently intends to offer its service in Eagle, Garden City, Hailey, Ketchum, Salmon, and Sun Valley. However, NextG also will seek to offer its services throughout the entire state of Idaho.

NextG will provide radio frequency ("RF") transport and backhaul services to commercial mobile radio service ("CMRS") providers. NextG also may transport its wireless customer's data services. NextG will provide its services using a system of fiber optic cables and small antennas and conversion equipment attached to poles and other structures. NextG will provide both interstate and intrastate services. At this time, NextG does not intend to furnish residential or business local exchange services or switched, interexchange telephone service.

NextG will only provide RF Transport Services where technology permits. The furnishing of RF Transport Services requires certain physical arrangements of equipment and facilities of NextG and other entities and is subject to the availability of such equipment and facilities and the economic feasibility of providing such necessary equipment and facilities and the RF Transport Services. NextG will offer service subject to the availability of the necessary facilities and/or equipment. NextG will reserve the right not to provide service to or from a location where the necessary facilities or equipment are not available.

Idaho Public Utilities Commission

Page 3

The Company's services will be generally provided on a monthly basis and will be available twenty-four (24) hours per day, seven (7) days per week, subject to the availability of necessary service, equipment and facilities.

RF Transport Services uses optical technology, including multi-wavelength optical technology over dedicated transport facilities to provide telecommunications companies with more efficient transport and greater overall network service options. RF Transport Services connect customer-provided wireless capacity equipment to customer-provided or NextG provided bi-directional RF-to-optical conversion equipment at a hub facility. The hub facility can be customer or NextG provided. The conversion equipment will allow NextG to accept RF traffic from the customer and then send bi-directional traffic transmission across the appropriate optical networks. At the remote end, NextG or the telecommunications company will provide RF-to-optical conversion equipment to allow bi-directional conversion between optical signals and RF signals. RF signals can be received and radiated at this remote node.

There will be some specific limitations applicable to RF Transport Services, including the following:

- All optical services are provided on single mode optical fiber
- Some optical services may be of a multi-wavelength nature
- Current wireless standards limit the distance between a hub site and a remote node to 20 kilometers
- The optical loss between a hub site and a remote node must not exceed 18dB

NextG intends to reserve the right to discontinue furnishing the service upon its written notice, when necessitated by conditions beyond its control or when the customer is using the service in violation of the law.

**(5) Address(es) and toll-free telephone number(s) for personnel responsible for handling consumer inquiries, complaints, etc., by the public**

NextG's customers can contact the company toll-free at 1-866-44-NEXTG (63984). Customers also may send correspondence to the following address:

1759 South Main Street  
Suite 128  
Milpitas, CA 95035

**(6) Name(s), United States mail and electronic (if available) addresses, and telephone number(s) of person(s) designated as a contact for the Commission Staff in resolving consumer complaints, responding to consumer inquiries, and answering matters concerning rates and price lists or tariffs.**
